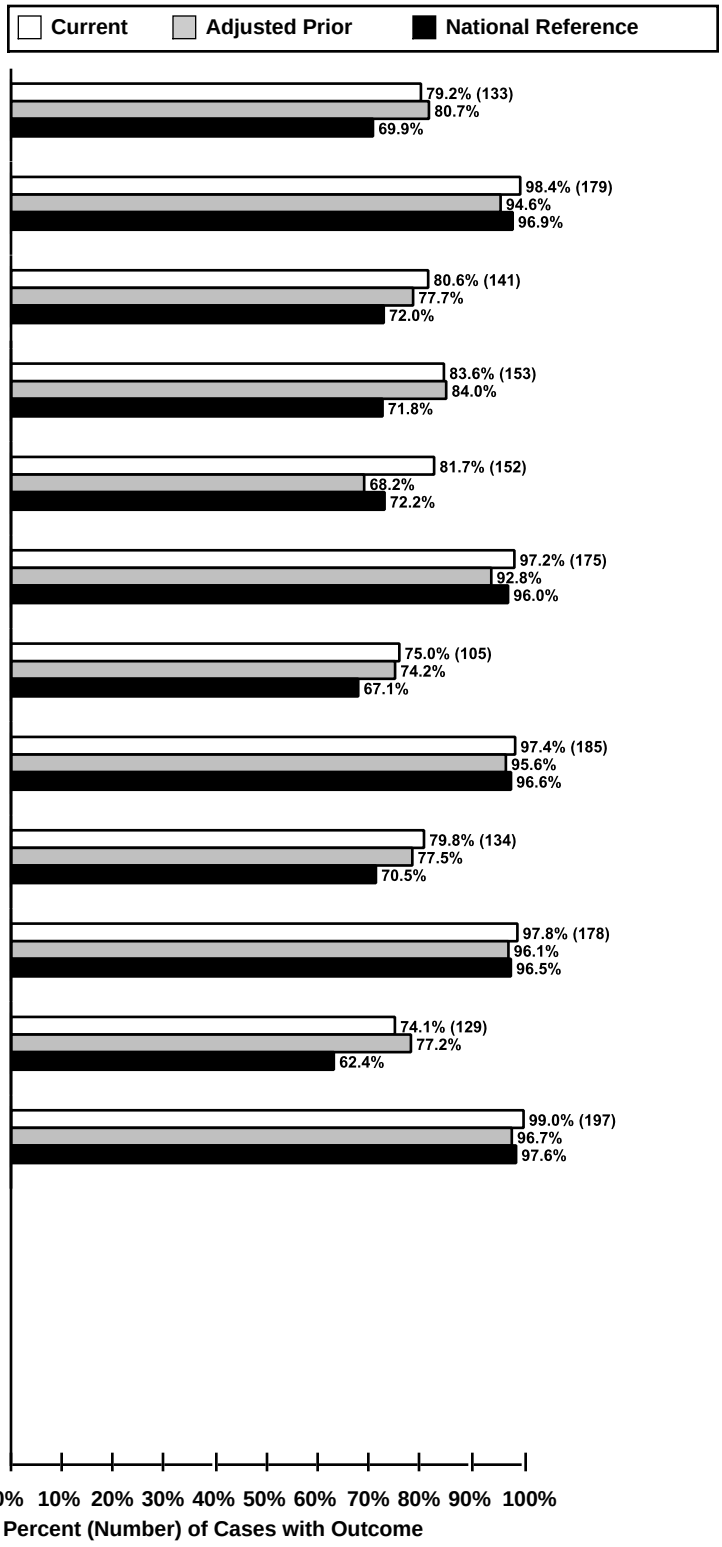
Improvement in Bed Transferring	174	
	110	0.65
	3638573	0 **
Stabilization in Bed Transferring	199	
	145	0.14
	4024608	0.18



* The probability is 10% or less that this difference is due to chance, and 90% or more that the difference is real.

** The probability is 5% or less that this difference is due to chance, and 95% or more that the difference is real.

\+ The probability is 10% or less that this difference is due to chance, and 90% or more that the difference is real.

++ The probability is 5% or less that this difference is due to chance, and 95% or more that the difference is real.

\# This outcome has been risk adjusted. However, the predictive model for this outcome is less robust than the other predictive models.

Note: When a measure value is calculated using less than 10 Episodes of care, the statistical significance level will not be displayed on the report.

This report has not been approved to meet privacy requirements and can only be used by the home health agency and state agency for defined purposes.
